David J. Bradley, Clerk of Court

Dear Honorable Judge Andrew Hanens,

I am writing this letter ^{to you} that since I came to Carswell Medical facility, I have not been getting the treatments I should be getting for my stage 4 breast Cancer. All the medicines that have been prescribed are not working at all. Some of them makes my condition worst. I came to Carswell September of 2017 and had to wait for about a couple of months to see the oncologist (Genesa) which I did. She started me on Ibrance ⁽¹⁾ letrozole for my Metastatic breast Cancer. I took it for sometime and it was changed ^{to} ⁽²⁾ Facilodex injections because it did ^{not} work. I took Facilodex Hormonal Injections for about 3-4 months but my condition

2.)

worsened as indicated by PET SCAN. So Dr. Genesa P. the Oncologist started me again on a different Medications which are Everolimus 10mg and Exemestane (3.) which have serious side effects. (A long list of them) Everolimus & Exemestane are causing me serious side effects such as stomach pain, very high liver enzymes and swollen and ^{severe} pain right hand and finger. When I took or started Everolimus & Exemestane my right hand and fingers were very swollen and painful. So the Physician told me to stop taking them for a week which I did. The following week the Oncologist restarted me on the medication again and after a week the lab work ^{showed} ~~should~~ very high liver enzymes. I was told again to stop taking the medications. So currently I am

3.)

not on any medications for Metastatic breast Cancer. Honorable Judge Andrew Hanens. It is about 3-4 weeks that I was prescribed Antibiotic^{ointment} for the wound on my breast as a result of my Cancer and I have not received the medicine yet because the doctor at Carswell have not co-sign it. X-ray of my right was done last week and it is three weeks that it was ordered and nothing has been done with my very swollen and painful hand and fingers. I am actually struggling to write to you at the moment. My fingers are hurting me badly as I am writing. I am so frustrated with the type of treatments I am receiving at this facility. The main reason my Cancer became terminal and metastatic was

4.)

because of gross negligence by Joe Coerly Detention Center in Conroe, Texas. The doctor Nguyen Van Daniel ignored my breast complaints on several occasions and prescribed only Ibuprofen and NEVER examined my breast. It is actually under investigation at the moment. Because of Dr. Nguyen Van Daniel negligence I ended up with stage ^{terminal} breast cancer. Then I was transferred here from Conroe, Texas (Joe Coerly Detention) ~~with~~ with the idea that I would get the best of treatment but all in vain. A pregnant inmate at Carswell also got positive with Corona Virus and she is at the hospital in critical condition. She came with 31 inmates from Oklahoma to Carswell a little over a week ago. I am at risk to contract Corona.

57

because of my terminal status. Please ^{Honorable} Judge
Andrew Hanens this is the truth of what is
going on with me here. So that is why I am
writing to you before you decide on my Compassionate
release motion. My condition has changed
completely since I was detained and came to
prison. Right now I can barely walk around
because of generalized body pain and feet
numbness due to neuropathy related to chemo. The
way things are going regarding my treatments
here at Carswell can lead me to my Grave.
Please Judge help me get a second opinion
out of this facility if possible as soon as possible
or ~~else~~ else I will die leaving behind my twin
boys Trevor and Travis including Chandel my
daughter.
Thank you your Honor.
